

Current situation at FLEXA GmbH: Your supply security and our measures

Covid-19 preventive measures have started

Due to the current situation in connection with the rapidly spreading Covid19 virus, we are receiving an increasing number of enquiries about the situation and the extent to which the supply chain can be secured.

Our first priority is to protect our employees, customers and suppliers and we will therefore do everything necessary to ensure this protection.

As you can see from our current reporting, everything seems possible at the moment and we must all work together to wait for developments and react accordingly.

The supply chains for our production at the Hanau-Steinheim site are intact, so there have been no delays or delivery problems so far.

We have implemented the following measures to protect our employees and to safeguard operations:

- All visits to customers and suppliers are suspended until further notice. Where possible, this will be covered by telephone or video conferences.
- Furthermore, we refrain from all types of business trips, both national and international, and are in telephone contact with our partners in this regard as well.
- In production, staffing levels have been reduced by changing shifts in order to further minimize the risk of infection.
- By closing schools and day-care centres throughout Germany, we have implemented individual home office solutions for our employees with children, so that they can fulfil their educational duties and protect risk groups.
- You can reach our employees as usual by telephone and e-mail.
- Our supply chain is not currently affected, as the border closures only affect the movement of people and not goods. However, extended control measures may result in longer processing times at the borders, which we are keeping a close eye on at all times in order to react accordingly.
- In accordance with our emergency plan, our employees are and will be regularly informed about protection against infections, the recognition of symptoms of illness and instructions for action in the event of illness.

It is now up to all of us to stem the rapid spread of the Covid19 virus and break the chains of infection in order not to overload our health care system.

In this spirit, we wish you, your and our employees all the best and hope that together we will get through these times successfully and, above all, healthy.

As soon as the situation changes, we will inform you immediately.

Thank you very much for your understanding and your assistance!

Stay healthy!

Your Team FLEXA
