

NEW GENERATION PLUS

ROHRflex PA 12F+

ROHRflex PA 12+

INNOVATIVE MULTILAYER TECHNOLOGY CONVINCING THROUGH QUALITY AND DURABILITY

- Excellent dynamic properties
- Highest fire protection requirements
- Abrasion indicator
- Best bending resistance, even at low temperatures (-50°C to 120°C)

Recommendations on areas of application, fields of use, products or product combinations are made by FLEXA to the best of its knowledge and previous findings and experience. The use of FLEXA products for specific applications must be verified by the user. All published texts, product illustrations, drawings and tables may not be copied, edited or modified without the consent of FLEXA. Technical drawings, approvals, certificates and results of FLEXA's own test laboratory will be provided upon request. We reserve the right to make printing errors, mistakes in technical drawings, errors and technical changes.
